

Detailed Listing of the Claims:

The present listing of the claims replaces any previous listing of the claims:

1. – 40. (Canceled).

41. (Currently Amended) A cosmetic composition for skin comprising:

at least one unsaponifiable component from avocado oil;

at least one unsaponifiable component from soya bean oil, lupin oil, or mixtures thereof; and

at least one cosmetically acceptable vehicle for applying the composition to skin,

wherein the at least one unsaponifiable component from avocado oil is chosen from dry avocado oils.

wherein the unsaponifiable component from soya bean oil, lupin oil, or mixtures thereof comprises about 40% to about 65% sterols and greater than about 10% tocopherols,

wherein the cosmetic composition has a weight ratio of the unsaponifiable component from avocado oil to the unsaponifiable component from soya bean oil, lupin oil, or mixtures thereof of about 0.1 to about 9, and

wherein the unsaponifiable component from avocado oil and the unsaponifiable component from soya bean oil, lupin oil, or mixtures thereof comprise about 0.1% to about 10% of the composition by weight.

42-52. (Canceled).

53. (Currently Amended) A cosmetic treatment for scars comprising applying the a composition of claim 41 to skin, neighboring mucous membranes, superficial body growths, or a combination thereof, wherein the composition comprises

at least one unsaponifiable component from avocado oil;

at least one unsaponifiable component from soya bean oil, lupin oil, or mixtures thereof; and

at least one cosmetically acceptable vehicle for applying the composition to skin.

54.-66. (Canceled).

67. (New) A method for treating a scar comprising applying to the skin, neighboring mucous membrane, and/or superficial body growth of a patient in need thereof an effective amount of a composition comprising:

at least one unsaponifiable component from avocado oil;

at least one unsaponifiable component from soya bean oil, lupin oil, or a mixture thereof; and

at least one cosmetically acceptable vehicle for applying the composition.

68. (New) A method for treating hirsute skin comprising applying to the skin of a patient in need thereof an effective amount of a composition comprising:

at least one unsaponifiable component from avocado oil;

at least one unsaponifiable component from soya bean oil, lupin oil, or a mixture thereof; and

at least one cosmetically acceptable vehicle for applying the composition.

69. (New) The method of claim 67 or 68, wherein the composition comprises at least one unsaponifiable component from dry bean oil.

70. (New) The method of claim 67 or 68, wherein the composition comprises at least one unsaponifiable component from soya bean oil.

71. (New) The method of claim 67 or 68, wherein the at least one unsaponifiable component from avocado oil comprises at least one fraction enriched with furan derivatives, at least one fraction enriched with polyhydroxylated fatty alcohols, or a mixture thereof.

72. (New) The method of claim 67 or 68, wherein the at least one unsaponifiable component from soya bean oil, lupin oil, or a mixture thereof is mainly composed of sterols and tocopherols.

73. (New) The method of claim 67 or 68, wherein the at least one unsaponifiable component from soya bean oil, lupin oil, or a mixture thereof comprises from about 40% to about 65% sterols and greater than about 10% tocopherols.

74. (New) The method of claim 67 or 68, wherein the composition has a weight ratio of the at least one unsaponifiable component from avocado oil to the at least one unsaponifiable component from soya bean oil, lupin oil, or a mixture thereof ranging from about 0.1 to about 9.

75. (New) The method of claim 67 or 68, wherein at least one unsaponifiable component comprises a fraction rich in phytosterols, tocopherols, tocotrienols, terpenic and triterpenic hydrocarbons, natural antioxidants, or a mixture thereof.

76. (New) The method of claim 67 or 68, wherein the at least one unsaponifiable component from avocado oil and the at least one unsaponifiable component from soya bean oil, lupin oil, or a mixture thereof comprise from about 0.1% to about 10% of the composition by weight.

77. (New) The method of claim 67 or 68, wherein the at least one unsaponifiable component from avocado oil and the at least one unsaponifiable component from soya bean oil comprise from about 0.1% to about 10% of the composition by weight.

78. (New) The method of claim 67 or 68, wherein the composition further comprises at least one unsaponifiable component from canola oil, rapeseed oil, sunflower oil, palm oil, maize oil, sesame oil, wheatgerm oil, or a mixture thereof.

79. (New) A method for treating scar comprising applying to the skin, neighboring mucous membrane, and/or superficial body growth of a patient in need thereof an effective amount of a composition comprising:

at least one unsaponifiable component from canola oil, rapeseed oil, sunflower oil, palm oil, maize oil, sesame oil, wheatgerm oil, or a mixture thereof;

at least one unsaponifiable component from avocado oil, lupin, soya bean oil, or a mixture thereof; and

at least one cosmetically acceptable vehicle for applying the composition.

80. (New) A method for treating hirsute skin comprising applying to the skin of a patient in need thereof an effective amount of a composition comprising:

at least one unsaponifiable component from canola oil, rapeseed oil, sunflower oil, palm oil, maize oil, sesame oil, wheatgerm oil, or a mixture thereof;

at least one unsaponifiable component from avocado oil, lupin, soya bean oil, or a mixture thereof; and

at least one cosmetically acceptable vehicle for applying the composition.

81. (New) The method of claim 79 or 80, wherein the at least one unsaponifiable component from canola oil, rapeseed oil, sunflower oil, palm oil, maize oil, sesame oil, wheatgerm oil, or a mixture thereof, and the at least one unsaponifiable component from avocado oil, lupin oil, soya oil or a mixture thereof comprise from about 0.1% to about 10% of the composition by weight.
